Tsim12345	<p>I'm a female who has some medical issues and I probably won't ever be able to have baby. In a way, I'm bummed... But also in a way I feel like this huge burden of having to be pregnant at some point has been lifted from my shoulders. I just can't imagine going through that and putting my body in such pain when there are already babies out there that need homes... Just my perspective.</p>	Female	<ul style="list-style-type: none"> • Long Comment • Proper Grammar • Neutral language
IReportDumb-Cunts	<p>What do women do that makes them smell so good? It seems almost any woman of average attractiveness or higher smells incredible. When they walk past, you get that whiff of air and just inhale deeply. Shits magical.</p> <p>That makes me sound like a creep, and you're right, I am, but I'm a curious creep.</p>	Male*	<ul style="list-style-type: none"> • Long Comment • Comments on physical attractiveness • Proper Grammar • Apologetic

mrchicano-209	I use the waistband to hold my penis against my stomach but its nearly impossible to do this in front of others without making it obvious. Liz_doll	<p>I want to know what men think of Brazilian waxes, or no hair down there on a woman. And also I want to know what men think of lipstick, particularly red lipstick. Is it attractive? Is it a turn off? Also, what are you thinking when a girl is on top? I always feel like I look gross but I do it anyways. And those are all of my questions.</p> <p>*Edit: Thanks for all of your responses! What I've concluded from most of your answers - 1. Most of you prefer no hair, and many of you don't mind a little hair, as long as it's trimmed. 2. Lipstick is a weird one, most of you don't care for it, many of you think it depends on how it looks/the girl wearing it. 3. Girl on top = yes. So much yes.</p>	Female*	<ul style="list-style-type: none"> • Long Comment • Question • Comments on physical attractiveness • Supportive • Proper Grammar • Casual language

Team_Sprocket	<p>What does having a penis and all the stuff that comes with it <i>feel</i> like? Is it heavy? Does it wiggle when you walk? What's it feel like, physically, when it gets hard? Can you feel the blood moving into it? What about when it 'deflates'?</p> <p>Edit: awesome responses, folks!
