

All plaques by camp ground -  
not where I found tar  
seepage

↓  
lifeguard station w/ octopus  
↳ long strip of tarred-up  
stone and some ~~wood~~  
as brick structure, plants  
of wood to keep the  
gas in place?

↓  
Sattler's Mine?

how fluid is the tar?  
some curley bulbous, some  
finely dripped ~~like~~ like chocolate  
spills over cake of a  
Lovecraftian nightmare

get to park at end of  
the composite follow bluffs  
to big formation from Trip  
Advisor

people build structures out of  
driftwood here, with Chevron  
pier in background

Chevron pier is not on  
google maps, not even  
on the radar - big piers  
as you walk along bluffs -  
one spot real covered in  
ice plant - the mark of  
colonization  
it's Thantoging  
these are American plays

The people are patriotic  
today as I am sick  
the fat doesn't smell, too  
cold to be sticky, it rains  
I don't take off my shoes  
I see a flag with the  
stars and stripes, I yell  
at cars. Lowell  
security is making the  
rounds as I take pictures  
of what Alcatraz wears  
once more - why didn't  
they find fossils here?  
I pee in a bush as  
they go by again

There are signs that  
the beach is closed at  
the pier, no trespassing,  
private property. I guess  
the only way to enjoy this  
public place is to pay the  
park by Linden Ave.  
I go around an Animal  
run and find an orange  
barricade and go around  
it up to the party lot,  
there are a lot of cars  
there and a party  
why did they erase  
themselves from the  
map? there are so many  
people here
