

Government Laboratory,

Barbados, October 17th 1900.

Dear Sir,

One of my pupils in the Agricultural Science Course, Barbados, desires to study Agriculture and Sugar Cane planting: and the manufacture and Chemistry of Sugar in the United States of America. The reputation acquired in these subjects by the Louisiana State University would naturally lead him to select that seat of learning: but he is of mixed race, I mean he is coloured.

I should esteem it a great favour if you would inform me if coloured students are admitted, and if the fact of his being coloured would be any hindrance or discomfort to his studies.

Thanking you in anticipation

I am

Your obedient servant,

J.P. de Albuquerque

Island Professor of Chemistry & Agric. Sci.

Professor William C. Stubbs,
Director Experiment Station,
New Orleans,
U.S.A.
