Faculty Research Day!

1. Explore the room! See as many posters as you can.
2. Choose one or two that seem most interesting. What drew you in? Why, specifically, were you interested?
3. Consider the faculty member there. What is the professor's name and in what Department(s) does that faculty member teach?
4. Describe the scholarship in the poster. What is the faculty member's scholarship about? What form is it in (article? Book? Something else?)
5. Ask the professor to discuss his or her work. Rather than ask rote/required questions, ask some you come up with based on the poster and your interests. Briefly write what you discussed/learned about the professor and/or his/her work.
